

JavaScript cheatsheet – <https://github.com/Serrin/Celestra/>

Web Storage api and JSON	element.dataset & data-* attributes	TypedArray
<p>IE8 compatible</p> <p>localStorage: localStorage.length; localStorage.key(index); localStorage.getItem(key); localStorage.setItem(key, data); localStorage.removeItem(key); localStorage.clear();</p> <p>sessionStorage: sessionStorage.length; sessionStorage.key(index); sessionStorage.getItem(key); sessionStorage.setItem(key, data); sessionStorage.removeItem(key); sessionStorage.clear();</p> <p>hasItem: localStorage.getItem(key) !== null sessionStorage.getItem(key) !== null</p> <p>setJSON: localStorage.setItem(key, JSON.stringify(object)); sessionStorage.setItem(key, JSON.stringify(object));</p> <p>getJSON: JSON.parse(localStorage.getItem(key)); JSON.parse(sessionStorage.getItem(key));</p>	<p>- IE11 compatible - element data-* attributes - no methods and events</p> <p>camelcase: element.data-name -> element.dataset.name element.data-first-second -> element.dataset.firstSecond</p> <p>set: element.dataset.name = "value"; element.dataset["name"] = "value"; element.setAttribute("data-name", "value"); element["data-name"] = "value";</p> <p>get: element.dataset.name; element.dataset["name"]; element.getAttribute("data-name"); element["data-name"];</p> <p>remove: element.removeAttribute("data-name");</p>	<p>IE10+11 compatible</p> <p>new TypedArray(); <i>ES2017</i> new TypedArray(length); new TypedArray(typedArray); new TypedArray(object); new TypedArray(buffer[,byteOffset[,length]]);</p> <p>Int8Array(); -128 to 127, 1 byte, int8_t</p> <p>Uint8Array(); 0 to 255, 1 byte, uint8_t</p> <p>Uint8ClampedArray(); 0 to 255, 1 byte, uint8_t, not in IE10-11</p> <p>Int16Array(); -32768 to 32767, 2 byte, int16_t</p> <p>Uint16Array(); 0 to 65535, 2 byte, uint16_t</p> <p>Int32Array(); -2147483648 to 2147483647, 4 byte, int32_t</p> <p>Uint32Array(); 0 to 4294967295, 4 byte, uint32_t</p> <p>Float32Array(); 1.2x10-38 to 3.4x1038, 4 byte, float</p> <p>Float64Array(); 5.0x10-324 to 1.8x10308, 8 byte, double</p>

element.classList

IE10+IE11 don't have support for classList on SVG or MathML elements.

element.classList.add(String[,String]);

IE10+11: yes (except the multiple arguments)

element.classList.remove(String[,String]);

IE10+11: yes (except the multiple arguments)

- Removing a class that does not exist, does NOT throw an error.

element.classList.contains(String);

IE10+11: yes

element.classList.toggle(String[,force]);

IE10+11: yes (except the second argument)

- When only one argument is present: Toggle class value; if class exists then remove it and return false, if not, then add it and return true.

- When a second argument is present: If the second argument evaluates to true, add specified class value, and if it evaluates to false, remove it.

element.classList.item(Number);

IE10+11: yes

element.classList.length;

IE10+11: yes

element.classList.replace(oldClass, newClass);

IE10+11: No and the method isn't compatible with the Safari and mobile browsers too.

Remove all classes:

element.className = "";
