Celestra v1.18.1 cheatsheet – https://github.com/Serrin/Celestra/

The "Celestra" and the "_" objects contain these functions, except the "doc" (this is global) and the polyfills. Example: "_.gsa()"

```
Basic API
                                                                DOM
                                                                                                  Functional programming
                                          domCreate(<type>[,properties[,innerHTML]]);
doc = document
