Celestra cheatsheet – v2.0.0 – https://github.com/Serrin/Celestra/

The "Celestra" and the " " objects contain these functions, except the "doc" (this is global) and the polyfills. Example: " .gsa()"

```
Basic API
                                                                                                Functional programming
                                          domCreate(<type>[,properties[,innerHTML]]);
